Docket No.: 1338-0178P

AMENDMENTS TO THE CLAIMS

Claims 1-5 (Cancelled)

6. (Currently Amended) A food storage container comprising:

a non-plastic container body containing walls defining an opening in the upper side

thereof;

a closed ring-shaped plastic rim formed on the upper side walls of the non-plastic

container body, said closed ring surrounding said opening and provided with locking protrusions

extending therefrom, and

a plastic coating layer integrally formed with the plastic rim and extending around the

outer surface and lower portions of the container body, and

a plastic lid provided with a groove for engaging the container walls, at said upper side

thereof and further containing locking wings for engaging with the locking protrusions of the

closed ring.

7. (Previously Presented) The food storage container of claim 6, wherein the closed

ring-shaped plastic rim defines a top portion of a container outer shell which is continuous with

and surrounds the non-plastic container body.

8. (Previously Presented) The food storage container of claim 6, wherein a sealing

2

ring is provided in the groove of the plastic lid.

Application No. 10/773,304 Amendment dated July 19, 2007

After Final Office Action of April 20, 2007

9. (Previously Presented) The food storage container of claim 6, wherein the

locking protrusions extend from opposite sides of the ring-shaped plastic rim.

10. (Currently Amended) The food storage container of claim 6, wherein the the non-

Docket No.: 1338-0178P

plastic container body is made of a material selected from the group consisting of glass, stainless

steel and ceramic.

11. (Previously Presented) The food storage container of claim 6, wherein each

locking wing has at least one locking hole and is foldable for engaging with the locking

protrusions.

12. (Previously Presented) The food storage container of claim 6, wherein the groove

has a substantially U-shaped configuration for engaging at said opening, the inner and outer

3

walls of the container body.
